Rajagiriya, Colombo, Sri Lanka

PROFILE

Full-stack software engineer with nearly 2 years of industry experience, currently an Associate Software Engineer at Agrithmics (Pvt) Ltd building enterprise ERP systems used by plantation companies in Sri Lanka and Bangladesh. Strong in React, .NET Core (C#) with Clean Architecture, Dapper and SQL Server, with hands-on Azure DevOps CI/CD delivery. Also builds SaaS products with Next.js, NestJS, FastAPI and Supabase. Holds a Higher National Diploma in Software Engineering from NIBM (GPA 3.81). Like on the rugby field, I bring discipline, fast adaptability and a team-first mindset to every sprint.

WORK EXPERIENCE

Associate Software Engineer *Agrithmics (Pvt) Ltd* May 2025 - Present

- Core full-stack developer on AgriGen ERP, an enterprise tea/agricultural estate management platform serving Sri Lanka and Bangladesh, built on React + Material-UI v4, .NET Core C# with Clean Architecture, Dapper ORM and SQL Server.
- Designed the database schema (v1.1-v1.3) and mobile sync architecture for the Checkroll (estate payroll & attendance) module, and built a SQL bulk-upload pipeline for plucking attendance data used by plantation clients.
- Built the Field-wise Profit & Loss report end-to-end (SQL stored procedures, C# service layer, React drill-down UI), plus tea manufacturing and green leaf analytics dashboards using complex SPs and CTEs.
- Architected a Multi-Pack Invoice Configuration feature using a Bridge Table pattern, enabling backward-compatible schema changes across 7 screens with a unified SQL view and a reusable React MultiPackInput component.
- Debugged critical production issues, including a JavaScript toISOString() timezone bug that shifted Green Leaf weight-deduction dates during IST-to-UTC conversion.
- Implemented Polly retry policies and structured NLog error logging across AccountPayable and InvoicePayment repositories.
- Handled production data work for client ERP systems: bulk stock uploads for multiple estates, 20,000+ row inventory price corrections, payroll/loan data fixes and Dev-to-QA database sync scripts.
- Deployed applications through Azure DevOps CI/CD pipelines to Azure VMs.

Intern Software Engineer *Agrithmics (Pvt) Ltd* Dec 2024 - May 2025

- Contributed to AgriGen ERP, Cargills Supplier Chain and Balangoda Plantation Procurement System.
- Built responsive React UI components integrated with .NET backend APIs via Axios.
- Implemented Redis caching and RabbitMQ-based data load processing pipelines.

PROJECTS

Sethika - Donation & Dana Sponsorship Platform IN PROGRESS | *Next.js · .NET (C#) · SQL Server · Redis*

- Platform for temples, kovils, mosques, churches, elders' and children's homes to publish meal/donation needs and let donors sponsor them.
- Institution onboarding with legal-document verification and admin approval; database-driven RBAC down to screen, button and action level (view, create, edit, approve, reject) across 3 user types.

Kotasa - Shared Expense & Budget Manager | *Next.js · Supabase · Vercel*

- Office expense-splitting app (meals, rides and any shared cost) with equal/custom splits, who-owes-whom tracking, budgets with limits, and weekly bills sent by SMS.
- Google sign-in with admin approval for unknown accounts; non-registered members can still receive SMS bills and view their breakdown; admin panel, dark/light themes, mobile-responsive UI.

MediChainLK | *Next.js 15 · NestJS · FastAPI · React Native Expo · Prisma · Firebase · AWS · Neon*

- AI-powered multi-tenant pharmacy management platform for Sri Lanka (India/Bangladesh expansion): Turborepo monorepo with admin/pharmacy portals and a mobile app.
- Google Cloud Vision OCR + spaCy med7 NLP for prescription reading, Firebase Custom Claims RBAC (4 roles), and an adapter pattern for delivery/payment providers (PickMe Flash, Grasshoppers, PayHere, WEBXPAY); hosted on AWS Mumbai.

FileFlowOne (FYP) | *Next.js 14 · TypeScript · Python FastAPI · sentence-transformers*

- Open-source, privacy-first universal file conversion app (fileflow-one.vercel.app) with a research direction on edge-based SLMs for semantic data transformation.
- Designed the Semantic Fidelity Index (SFI), a cross-format semantic preservation metric (SFI = $0.35 \cdot S_{structural} + 0.45 \cdot S_{semantic} + 0.20 \cdot S_{functional}$), served via a FastAPI microservice using all-MiniLM-L6-v2.

Eventure - Event Ticketing System | *Next.js · Tailwind CSS · Ballerina · PostgreSQL*

- Placed 5th among 100 university teams at the 'Innovate with Ballerina' hackathon; ticket sales, photo submissions and QR-based event verification.

Care32 - Dental Clinic Management | *Next.js · Tailwind CSS · Supabase*

- Clinic operations platform covering patients, doctor schedules, treatment records and appointment bookings with real-time features and secure auth.

MinistoreX | *Kotlin · Jetpack Compose · Room DB · Supabase · Hilt*

- Android debt-tracking app for small shops with Sinhala/English support, theme switcher and Supabase cloud sync.

TECHNICAL SKILLS

Backend	.NET Core / C#, Clean Architecture, Dapper ORM, REST APIs, Polly, NLog, NestJS, FastAPI (Python), Ballerina
Frontend	React JS, Next.js 14/15, Material UI v4, Tailwind CSS, shadcn/ui, Hero UI, Framer Motion
Database	SQL Server (stored procedures, CTEs, views), PostgreSQL, MySQL, Supabase, Prisma
DevOps & Cloud	Azure DevOps, CI/CD Pipelines, Azure VMs, AWS, Firebase, Vercel
Messaging & Cache	RabbitMQ, Redis
AI / ML	Google Cloud Vision OCR, spaCy NLP, sentence-transformers
Mobile	React Native (Expo), Kotlin, Jetpack Compose, Room DB
Languages	C#, TypeScript, JavaScript, Python, Java, Kotlin, SQL
Tools	Git / GitHub, Turborepo, Agile / Scrum

EDUCATION

Higher National Diploma in Software Engineering Nov 2022 - Nov 2024
National Institute of Business Management (NIBM), Galle · GPA: 3.81

GCE Advanced Level - Physical Science Stream 2021
Vidyaloka College, Galle

REFEREES

Mr. Vishwa Rathnayake
Product Owner & QA Engineer - Agrithmics (Pvt) Ltd
+94 76 658 5070 | vishwa@agrithmics.lk

Mr. Evantha Dissanayake
Senior Software Engineer - ORYSYS Limited
